CT114 TUTOR

AIRCRAFT EQUIPMENT CODES AND INSPECTION REQUIREMENTS

(ENGLISH)

Issued on Authority of the Chief of the Defence Staff Publiée avec l'autorisation du Chef d'état-major de la Défense

OPI: DAEPM (FT) 5-2 2002-09-01 Ch 3 2005-04-18

LIST OF EFFECTIVE PAGES

Insert latest changed pages; dispose of superseded pages in accordance with applicable orders.

NOTE

The portion of the text affected by the latest change is indicated by a black vertical line in the margin of the page. Changes to illustrations are indicated by miniature pointing hands or black vertical lines.

Dates of issue for original and changed pages are:

Original	0	 2002-09-01	Ch	2	 2004-11-01
Ch	1	 2003-12-01	Ch	3	 2005-04-18

Zero in Change No. column indicates an original page. Total number of pages in this order is 408 consisting of the following.

Page No.	Change No.	Page No.	Change No.
Title	3	1-1-AL-4 to 1-1-AL-6	3

FOREWORD

- 1. This Aircraft Equipment Codes and Inspection Requirements (ECIR) was prepared IAW D-01-100-204/SF-007 (Preparation of Aircraft Equipment Codes and Inspection Requirements) for use on the CT114 TUTOR aircraft.
- 2. This ECIR provides a listing by Work Unit Code and Item Name of all significant items of aircraft structure, equipment and hardware, and where applicable, indicates their preventive maintenance task requirement.
- 3. This ECIR provides a ready reference to inspection items in the various aircraft systems, and a list of Work Unit Codes for use with the Aircraft Maintenance Management Information System (AMMIS) as described in CFTO C-05-030-001/AG-001.
- 4. The Work Unit Codes contained herein are assigned IAW C-05-030-002/AG-000 (Preparation of Work Unit Codes for Aircraft and Aircraft Equipment).
- 5. For change requests to this order, refer to CFTO C-05-005-P08/AM-001 (Maintenance of Aircraft Weapon Systems, Part 8, Maintenance of ECIRs and inspection Schedules).
- 6. Unless specified otherwise, abbreviations used in this order are those contained in MIL-STD-12D (Abbreviations for Use on Drawings, Specifications, Standards and in Technical Documents).
- 7. For authorization of any deviation, postponement or delay of inspections refer to CFTO C-05-005-P08/AM-001 (Maintenance of Aircraft Weapon Systems, Part 2, On Condition Maintenance, Inspections and Periodicities; and Part 7, Deviation From Normal Maintenance Standards).

APPLICABLE INSPECTIONS

- 8. The inspections applicable to the CT114 TUTOR aircraft are:
 - a. Primary Inspection, 14 days;
 - b. Periodic Inspection:
 - (1) Airframe Min 360 to Max 440 hrs, and
 - (2) Aero Engine Min 360 to 440 hrs.

NOTE

For Maintenance Record Set (MRS) purposes, Flying Time on the CT114 TUTOR shall be from wheels up to wheels down. Flying hrs. shall not be recorded if the aircraft does not take off.

INSPECTION VALIDITY

- 9. When the requirement for a quick turnaround exists an "AB" check may be carried out in lieu of an "A" check and "B" check. An "AB" check may be carried out on the CT114 TUTOR if the aircraft is on the ground 8 hours or less between landing and the next take-off.
- 10. "B" check validity as applied to the CT114 TUTOR shall be 8 hours.

CONTINUOUS OPERATIONS - NA

CONTINGENCY AIRCRAFT MAINTENANCE PROGRAM (CAMP) - NA

GENERAL INSTRUCTIONS

- 1. The ECIR for the CT114 TUTOR consists of Parts 1 to 6.
- 2. The contents of Part 1, Section 1 are listed by Work Unit Code (WUC) in alphabetical sequence by system.
- 3. The data contained on each page is arranged in tabulated form as follows:

WUC	Т	ITEM	FIG &	QTY	TASK	PREV	INSP	S	- 1	T/F	REMARKS
	Υ	NAME	REF	PER	FREQ	MAINT	REF	Ε	Ν	REQ	
	Р			A/C		TASK		С	D		
	Ε							Т			

a. WUC - From two to seven characters are used to identify selected Maintenance Functions or items of equipment by "System", "Subsystem", "Component" and "Part". Refer to CFTO C-05-030-002/AG-000 (Preparation of Work Unit Codes for Aircraft and Aircraft Equipment).

NOTE

Seven (7) asterisks in the WUC column indicate that the item or items are involved in more than one system or subsystem. AMMIS reporting in these cases requires identification of individual items by WUC as listed in the "ITEM NAME" column.

- b. TYPE Denotes item applicability, when more than one Series or Mark of aircraft type is listed in the ECIR and the item is not common to all Series or Marks. Use other letters to designate applicability by type on an as required basis. This column may not be required on equipment ECIRs.
- c. ITEM NAME The name of the item (nomenclature) is identical to that in the applicable Parts List.

NOTE

The part numbers shown in the item name column are for identification purposes only. For verification of part numbers refer to the "Fig & Ref" column which indicates the parts publication for the item.

d. FIG & REF - Reference data is obtained from the applicable aircraft or equipment parts publication.

NOTE

Unless otherwise specified, the "BE" section uses the C-14-165-000/MY-000 for ref. Any section of the ECIR (PT 1, SEC 1), with an asterisk in this column, indicates alternate reference.

- e. QTY PER A/C The quantity per aircraft of this item. Quantities are only shown when greater than one.
- f. TASK FREQ The frequency of inspection (task) assigned by NDHQ.
- (1) the inspection frequency for a servicing inspection is indicated by the applicable inspection of which it is part. Abbreviations used in this column are:

B CHK - Before Flight Check;

A CHK - After Flight Check;

AB CHK - Quick Turn Around Check; and

PI - Primary Inspection.

(2) the inspection frequency for scheduled inspection (Periodic, Supplementary, etc) is indicated by a number or numbers, e.g.:

1-2-3-4 - Item inspected on all PER;

1-3 - Item inspected on 1 and 3 PER only;

2-4 - Item inspected on 2 and 4 PER only;

Item inspected on 3 PER only;

ASI - Item inspected on Aircraft Sampling inspection;

TLIR - Item inspected on third Level Inspection and Repair.

NOTE

To prevent confusion with Periodic Inspections, the word "SUPP" will precede the supplementary card number in the Inspection Reference column.

g. PREV MAINT TASK - The applicable and effective task resulting from RCM analysis will be listed in this column. When the task is required, e.g. during arrival, defuelling, final area close out, etc, the remarks column my be used for amplification. The only abbreviations that may be used in this column are:

SAFE - Safety

VIS - Visual

R/I - Removal/Installation

LUB - Lubrication

RDY - Ready

OPNL - Operational Check

FUNC - Functional Check

NDT - Non-Destructive Testing

RPNSM - Replenishment

Or any combination of the above.

h. INSP REF - This column lists cross-references to the inspection schedule(s) in which inspection requirements of the items are listed. Inspection requirements may be listed in first, second and/or third level Inspection Schedules. Therefore, this column should be read in conjunction with the Task Frequency column to correctly identify the reference shown. The examples shown are provided to assist interpretation of this column.

INSP REF COLUMN	RESPONSIBILITY	REFERENCE PUBLICATION
AF-FUS-1		Servicing Inspection Schedule, Fuselage Group, Item 1
AF-5		A/C Periodic Inspection Schedule, Card AF-5

INSP REF COLUMN	RESPONSIBILITY	REFERENCE PUBLICATION
AE-2	Aero Engine	A/C Periodic Inspection Schedule, Card AE-2
IE-3	Instrument/Electrical	A/C Periodic Inspection Schedule, Card IE-3
ENG AE-3	Aero Engine	Aero Engine Periodic Inspection Schedule, Card ENG AE-3
ENG IE-6	Instrument/Electrical	Aero Engine Periodic Inspection Schedule, Card ENG IE-6
SUPP IE-2	Instrument/Electrical	A/C SUPP Inspection Schedule, Card IE-2

Occupation codes used in this column are:

AE - Aero Engine Technician

AF - Airframe Technician

AWS - Air Weapons Systems Technician

CRS - Communication/Radar Systems Technician

IE - Instrument/Electrical Technician

IS - Integral Systems Technician

PH - Photographic Technician

/NDT - Non-Destructive Testing Specialist

REF - Refinisher Technician

REF - Refinisher Technician

SS - Safety Systems Technician

NOTE

The NDT specialty shall always be listed after the prime occupation responsibility e.g. AF/NDT, to indicate the work is performed by NDT specialists.

- i. SECT Items contained in Part 1, Sections 2, 3 or 4 are indicated by a corresponding Section Reference, e.g. 2, 3 or 4 in this column. When a 2 is shown, the type of life, OVHL (overhaul) or RET (retirement) shall be indicated in the remarks column.
- j. IND Items which require an independent check IAW C-05-005-P05/AM-001 (Maintenance of Aircraft Weapon Systems, Part 2,Independent Checks after Maintenance) after being replaced, disconnected or disturbed for any reason will be indicated by an 'X' in this column.
- k. T/F REQ If an 'X' appears in this column refer to Part 3 to determine if the requirement is for a full card flight test, partial card flight test or a flight functional.

I. REMARKS - This column is used to clarify the requirements listed in the foregoing columns, and always indicates the reason for "replacement". Sample abbreviations used in this column are:

OVHL - Overhaul

RET - Retirement

ARR - Arrival

NDT - Non-Destructive Testing

RET-NAR - Retirement-not-AMMIS-reported

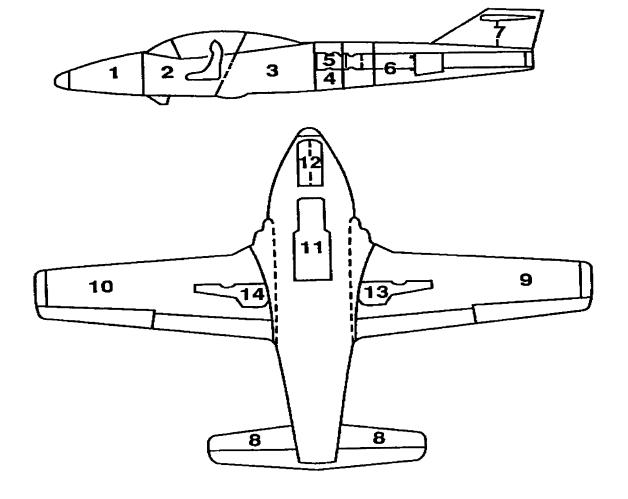

SHOP - Inspection Performed in a Shop

FACO - Final Area Close Out

- 4. Included in this ECIR Part 1, are the following Sections:
 - a. Section 2 Replacement Schedule Lifed Items, is a listing of all items which must be replaced within a specified period either for overhaul or retirement and the point of reference on which the time expiry is based. This section contains the following life parameters:
 - (1) The "Overhaul At" column lists the minimum and maximum life parameters applicable to those lifed items which are to be removed for overhaul.
 - (2) The "Retirement Life" column lists the minimum and maximum life parameters applicable to those items which, although not selected for repair, are to be removed within the window indicated by the "Min" and "Max" columns.
 - (3) Those items which are critical to safety of flight and are not to be extended shall be denoted by the use of an "asterisk" following the life parameter indicated in the Overhaul or Retirement Life "Max" column.
 - (4) Use of the following leading capital alphabetic superscript in the replacement record form column will specify the point of reference on which the time expiry is based:
 - (a) Assembly;
 - (b) ^BInstallation;
 - (c) CLast Inspection;
 - (d) DLast Use;
 - (e) EManufacture/Overhaul: or
 - (f) FCure Date.
 - b. Section 3 Out-of Sequence Inspection Requirements, is a listing of all inspections which must be carried out at a specified calendar time or in a specific time frame outside the aircraft Inspection Cycle and the point of reference on which the inspection interval is based. This section contains:
 - (1) Sub-Sections, as determined by the occupation responsible for the equipment.
 - (2) Use of the following leading capital alphabetic superscript in the Scheduling Forecast Record column will specify the point of reference on which the inspection frequency of the item is based:
 - (a) AAssembly;

- (b) ^BInstallation;
- (c) CLast Inspection;
- (d) DLast Use; or
- (e) ^EManufacture/Overhaul.
- c. Section 4 List of selected "Non-Lifed" components, a listing of those components that, due to their cost or functional importance, require the maintenance of a history record and logistics tracking.
- 5. Also included in the ECIR are the following parts:
 - a. Part 2 Shop Inspected Items (may be used as required). This part lists the minimum level of inspection required on components routed to Shop as listed in the ECIR. The appropriate WSM is responsible for the depth of inspection identified in this Part. References shall be provided to the applicable aircraft maintenance manual.
 - b. Part 3 Flight Test Requirement, lists flight test requirements, indicating which procedures or systems require a full card or partial card flight test or a flight functional to verify serviceability after corrective/ preventive maintenance.
 - c. Part 4 Non-Destructive Testing (NDT), lists all the NDT techniques developed by the ATESS Non-Destructive Testing Centre (NDTC) and authorized by NDHQ for use on the particular aircraft type.
 - d. Part 5 List of Approved Condition Monitoring (CM) Techniques. This part implements the CM concept for the aircraft. It provides Commands and Units with a ready reference list to all Condition Monitoring Techniques approved by the WSM for use on the aircraft type.
 - e. Part 6 Conditional Inspections, lists additional inspections that are contingent on specific conditions or incidents, which are required to ensure further safe flight. The specific inspection requirements for each condition are specified in CFTO C-12-114-000/NR-000 Part 6. Conditional inspection completion shall be recorded on Form CF 349.

- 1. FORWARD FUSELAGE
- 2. COCKPIT AND CANOPY
- 3. CENTRE FUSELAGE
- 4. ENGINE COMPARTMENT
- 5. ENGINE
- 6. AFT FUSELAGE AND ENG JET PIPE
- 7. VERTICAL STABILIZER AND RUDDER

- 8. HORIZONTAL STABILIZER AND ELEVATOR
- 9. LH WING-AILERON AND FLAP
- 10. RH WING-AILERON AND FLAP
- 11. TROUGH
- 12. NOSE LANDING GEAR
- 13. LH MAIN LANDING GEAR
- 14. RH MAIN LANDING GEAR

ZNR00001

PART 1

SECTION 2

REPLACEMENT SCHEDULE - LIFED ITEMS - CT-114 TUTOR

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This section lists those components which are to be removed withing the window indicated in the "Replace At" column for overhaul. The "Retirement Window" is the maximum time during which the item can be used.
- 3. Use of an asterisk (*) denotes an item for which extension wll not be authorized. Refer to CFTO C-05-005-P08/AM-001, Part 7.
- 4. Use of the following leading capital alphabetic superscript in the Replacement Record Form column will specify the point of reference on which time expiry is based:
 - ^A Assembly
 - ^B Installation
 - ^C Last Inspection
 - D Last Use
 - ^E Manufacture/Overhaul
 - F Cure Date

PART 1 SECTION 2 SUB-SECTION 6 - SAFETY SYSTEMS								
			CF FORM ACTION OVERHAUL AT RETIREMENT				ENT LIFE	
WUC	ITEM	ITEM NAME AND QUANTITY PER AIRCRAFT	NATO STOCK OR PART RECORD RECORD FORM MIN MAX MIN MA					MAX

Explanation of Superscripted Notes:

- ¹ INSPECTION OF OXYGEN REGULATOR TO BE CARRIED OUT IAW C-22-010-010/CS-013. FOR EXTENTION TO 27 MONTH MAXIMUM AND SHELF LIFE 60 MONTHS REFER TO C-22-010-010/MF-000, FIG 2-6-1.
- ² REPLACE IAW C-74-377-A00/TX-000 (CARTRIDGE ACTUATED DEVICES LIFE AND APPLICABILITY). SEAT AND CANOPY CARTRIDGE ACTUATED DEVICE'S SHALL BE REPLACED ON THE NEAREST SUPPLEMENTARY OR PERIODIC INSPECTION BEFORE THEY BECOME TIME EXPIRED; UNDER NO CIRCUMSTANCES ARE CARTRIDGE ACTUATED DEVICES ALLOWED TO GO BEYOND THEIR EXPIRED DATE WITHOUT PRIOR APPROVAL FROM NDHQ. FOR LIFE EXTENTION AUTHORITY REFER TO C-22-020-020/CS-013.
- ³ THESE ITEMS ARE ALL PART OF THE DROGUE SYSTEM ASSEMBLY, ARE ALL LIFED AND ARE TRACKED USING WUC ALBB, DROGUE PARACHUTE ASSY L/H AND R/H (2) CF-363.

SECTION 3

OUT OF SEQUENCE INSPECTION REQUIREMENTS

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This section provides a listing of all inspections which must be carried out at a specified calendar time frame or in a specified time frame outside the aircraft inspection cycle.
- 3. Use of the following leading capital alphabetic superscript in the Scheduling Forecast Record column will specify the point of reference on which the inspection frequency of the item is based:
 - ^A Assembly
 - ^B Installation
 - ^C Last Inspection
 - D Last Use
 - ^E Manufacture/Overhaul

PART 3

MAINTENANCE FLIGHT TEST REQUIREMENTS - CT-114 TUTOR

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This Part identifies those occasions, after corrective/preventive maintenance activities or actions, which will require a Full/Partial airtest, or flight functional, to verify serviceability.
- 3. Acceptance test flights are carried out on aircraft that are built, modified, repaired or had Third Line Inspection And Repair carried out by a civilian contractor. The test shall include airframe, engine and other systems which the contractor or manufacturer has disturbed during the course of work on the aircraft in question.
- 4. The condition under which a Full Card or Partial Card airtest can be flown in conjunction with an operational mission, and the method of controlling the integration of flight tests and operational missions are stipulated in Part 4 of C-05-020-007/AM-000 Flight Test Orders for the CF.

PART 4

APPROVED NON-DESTRUCTIVE TESTING (NDT) TECHNIQUES

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This Part provides a list of all Non-Destructive Testing Techniques developed by the AMDU Non-Destructive Testing Centre (NDTC) which have been authorized by the WSM for use on this aircraft.
- 3. The technique number suffix indicates one of the following NDT methods. X for X-Ray, U for Ultrasonic, L for Liquid Penetrant, G for Gamma-Ray, E for Eddy Current, M for Magnetic Particle and V for Visual.

PART 6

CONDITIONAL INSPECTION REQUIREMENTS

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This Part lists additional inspections that are contingent upon specific conditions or incidents, which require an inspection to ensure further safe flight.
- 3. The actual inspection criteria will be detailed in the Servicing Inspection Schedule (NR) for this aircraft.
- 4. Conditional Inspection completion shall be recorded on Form CF349.

PART 6	COND	ITIONAL INSPECTION REQUIREMENTS
ITEM AND TRADE CODE		CONDITION

7	(514)	ENGINE OVERSPEED
8	(514)	ENGINE OIL FILTER CONTAMINATION
9	(514)	INSPECTION OF LANDING GEAR AFTER LOWERING AT EXCESSIVE SPEED
10	(514)	INSPECTION OF WING FLAPS AFTER LOWERING AT EXCESSIVE SPEED
11	(514)	INSPECTION OF AIRCRAFT AFTER HARD LANDING
12	(514)	INSPECTION OF AIRCRAFT WHEELS AND BRAKES FOLLOWING SEVERE BRAKING
13	(514)	INSPECTION OF CANOPY FOLLOWING USE OF CANOPY FOR EMERGENCY BRAKING
14	(514)	INSPECTION AFTER OVER G CONDITION AND AFTER FLIGHT THROUGH SEVERE TURBULENCE
15	(514)	INSPECTION OF EXTERNAL FUEL TANK INSTALLATION AFTER OVERSTRESS OR HARD LANDING
16	(514)	HYDRAULIC SYSTEM CONTAMINATION CHECK
17	(ALL)	INSPECTION OF AIRCRAFT FOLLOWING LIGHTNING STRIKE
18	(ALL)	INSPECTION OF AIRCRAFT SUSPECTED OF HAIL DAMAGE

PART 7

APPROVED ELEMENTARY TASK LIST FOR CT114 TUTOR

NOTES

- 1. Read and adhere to the "Foreword" and "General Instructions" of this ECIR.
- 2. This part provides a list of all elementary tasks approved by the CT114 Tutor WSM/AEO. This part does not constitute an authority to carry out these tasks, but rather acknowledges that each elementary task is consistent with the definition of "Elementary Work" as contained in the TAM, C-05-005-001/AG-001.
- Personnel must be trained, qualified and authorized to perform elementary tasks IAW C-05-005-P03/AM-001.
- Aircrew suitably trained and authorized may perform elementary tasks IAW C-05-005-P03/ AM-001.
- 5. The primary inspection is excluded from the elementary task list due to safety systems inspection checks requiring journeyman qualifications.

PART 7	CT114 TUTOR ELEMENTAR	RY TASK LIST
ELEMENTARY TASK	TASK DESCRIPTION	REMARKS
EL 01	ALL TRADES: A, B, A/B CHECKS	Authorizes the technician to perform and certify first level AVN/AVS preventive maintenance checks ONLY. Minimum MOC 500 QL 3.
EL 02	NICAD Battery	Authorizes the technician to perform and certify first level NICAD battery disconnect and reconnect ONLY. Minimum MOC 500 QL 3.
EL 03	First Level Maintenance Cockpit Blankets and Shrouds	Authorizes the technician to perform and certify first level maintenance on cockpit blankets and shrouds ONLY. Minimum MOC 500 QL 3.
EL 04	First Level Maintenance Interior and Exterior Lighting	Authorizes the technician to perform and certify first level maintenance on interior and exterior lighting ONLY. Limited to light bulb replacement. Minimum MOC 500 QL 3.
EL 05	Preparation of A/C for SOLO Flight	Authorizes the technician to perform and certify preparation of aircraft for SOLO flight IAW Unit MAP ONLY. Minimum MOC 500 QL 3.
EL 06	Opening and Closing Nonstructural Panels	Authorizes the technician to perform and certify first level opening and closing of nonstructural panels ONLY. Minimum MOC 500 QL 3.
EL 07	Setting of Radio Presets	Authorizes the technician to perform and certify first level setting of radio presets ONLY. Minimum AVS QL 3.
EL 08	Operational Loads Monitoring (OLM)	Authorizes the technician to perform and certify first level Operational Loads Monitoring (OLM) downloads ONLY. Minimum MOC 500 QL 3.
